Public Notice

For the public health of our citizens and employees, beginning on March 16, 2020, the Shelbyville Police Department will be implementing the following changes:

- March 16, 2020. We encouraged all citizens to submit any non-violent calls for service by telephone. Non-violent calls would be a theft from an un-locked vehicle, carport, storage shed, yard, etc. If there is a situation where a person was assaulted during the theft, we would need to come to the scene. If you feel there is evidence on the scene that may lead to an arrest of the offender, we will need to come to the scene. Our dispatchers will encourage you to speak with an officer over the phone and they will take your information to make a determination of our response.

- We also implemented the option to email reports upon request, in an effort to reduce traffic inside the department.

- April 4, 2020, we closed the doors at the entrance to the Shelbyville Police Department. It was posted that if someone needed assistance, there was a call box available that connected to dispatch if they required speaking with an officer. If they needed a report, the direct phone number to records was posted and the option of sliding the report through the door or emailing the report to them.

- April 4, 2020, we implemented a modified work schedule in order to have extra personnel available in the case of a exposure.
